User Code and Password

Each individual who has access to Wallis Bank's Internet Banking, including each individual named on joint accounts, must designate an access ID and password. For security purposes, you are required to change your access ID and password upon your initial first time login to Wallis Bank's Internet Banking. Password security is very important. It is mandatory that passwords be changed at least every 90 days. Passwords should be complex which means that numbers and special characters should be used. Using a phrase for a password is a good practice; it is easy to remember and harder to crack or guess. The password, a minimum of 8 characters, maximum of 16 characters, must contain at least two numeric characters and at least four alpha characters. You agree that we are authorized to act on instructions received under your password. You accept responsibility for the confidentiality and security of your password and agree to change your password regularly. After three unsuccessful login attempts, the Wallis Bank Internet Banking product will lock the user out. We recommend that the access ID consist of both upper and lowercase, alpha and numeric characters for security purposes. Your password should not be associated with any commonly known personal identification, such as social security numbers, address, dates of birth, names of children and should be memorized rather than written down.
